

OpenLedger Today: Latest News and Incoming Projects

Disrupt your industry. Power your startup.
Rationalize and control your business.

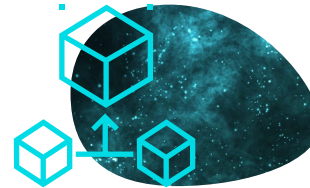

WHO WE ARE

CUSTOM BLOCKCHAIN DEVELOPMENT

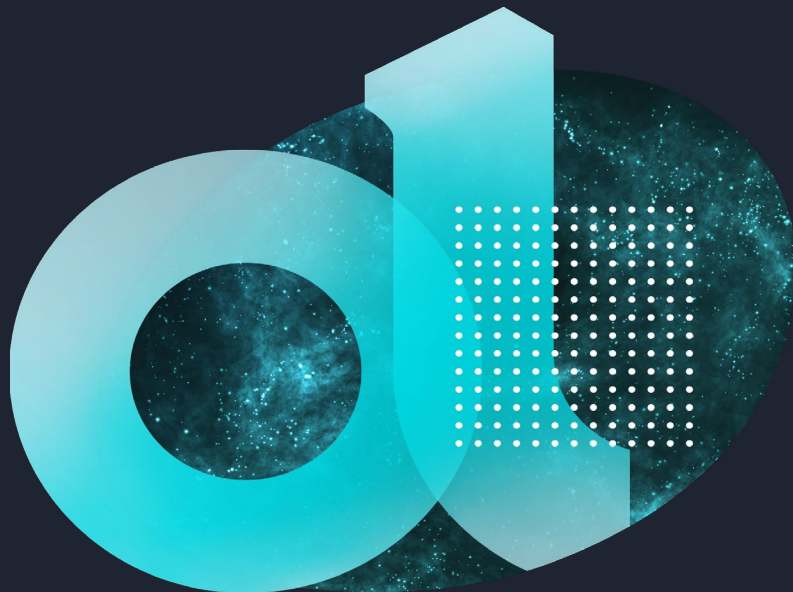

We offer blockchain software development services for individual and enterprise projects.

BLOCKCHAIN-BASED PRODUCTS

Our extensive expertise helped us build successful projects mainly based on the blockchain technology.

Our Projects: OpenLedger Decentralized Trading Platform

Easy to use

OpenLedger DEX has a simple, intuitive interface with improved filtering and asset trading functionality.

50+ Coins

50+ cryptocurrencies including Bitcoin, Ethereum, Ripple, NEO, Steem, Litecoin, Dash and EOS.

Mobile Wallet

Android wallet released. The app has the following functionality: deposit/withdraw, transfer, cancel orders, and history.

Price-stable crypto

Price-stable cryptocurrencies linked to real-world asset prices like bitUSD, bitEUR and bitCNY.

Our Projects: OpenLedger Decentralized Trading Platform

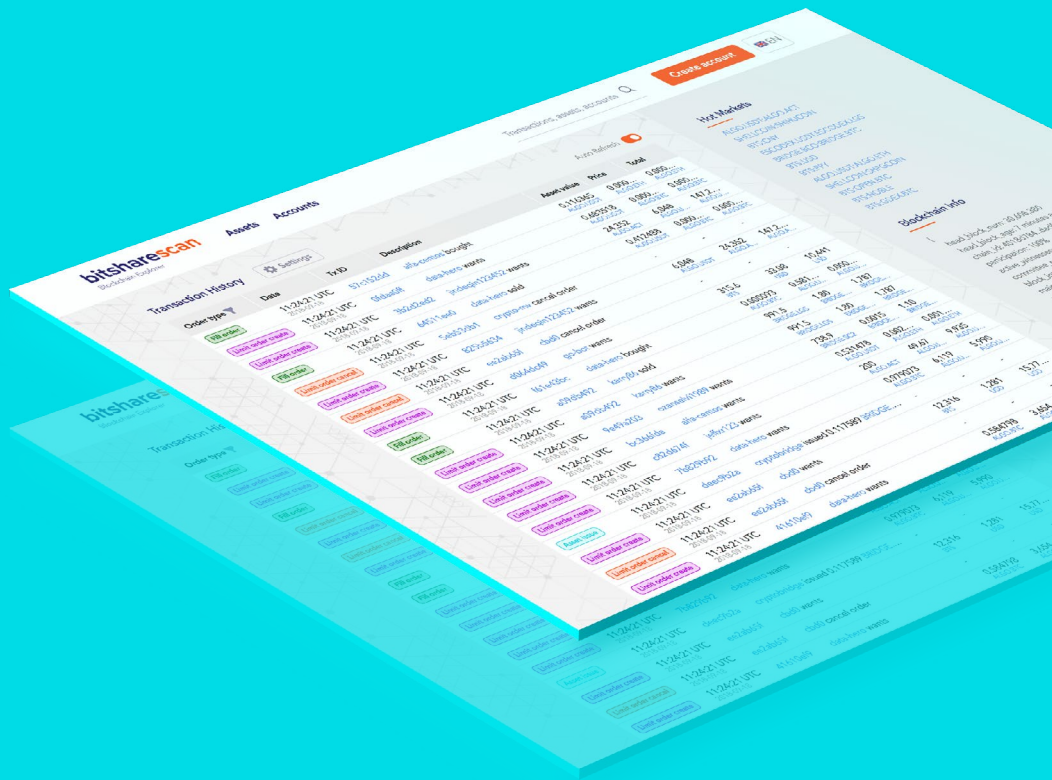

WHAT`S NEXT?

- Improvement of other site's sections
- Support of new browsers (e.g., Safari)
- Release of the iOS wallet
- Beneficial referral program with attainable rewards
- Enabling of fiat gateways
- Instant currency converter

Our Projects: BitShareScan

Blockchain Explorer that will rival other solutions for its functionality and usability.

VERSION 1.0

- Trading history
- Complete history of transactions
- Other functions similar to those of other explorers

WHAT`S NEXT?

- New versions of the explorer will be released
- Sections with voting information for workers, witnesses, and the committee will be added
- UI/UX will be improved

Our Projects: OpenLedger DAO Space

STARTUPS ACCELERATION AND CROWDFUNDING

Fully operates on-chain and offers:

- All OPEN assets & smartcoins support
- KYC and AML compliance
- BitShares native assets and referral program support
- OpenLedger DEX integration
- DAICO escrow and investment protection

**STARTUPS AND
WORKING BUSINESSES**

**SUPPORTERS
AND INVESTORS**

Our Projects: OpenLedger DAO Space

STARTUPS AND WORKING BUSINESSES

Pitch and promote to find partners
and investors

Crowdfund with secure payments
and automatic tokens distribution

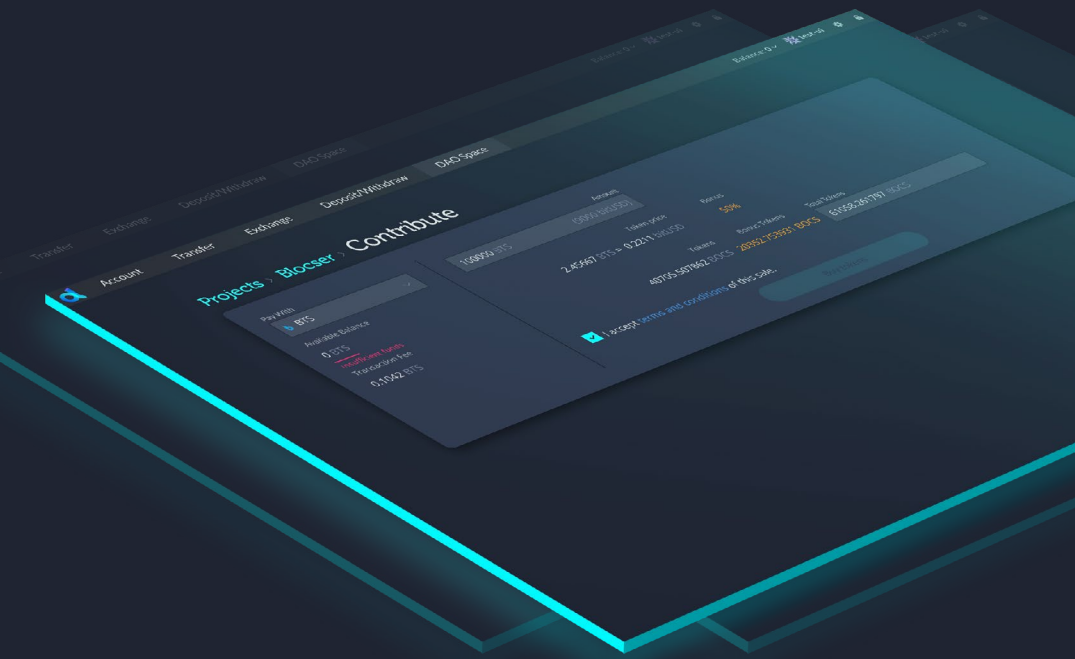

Comply with KYC and AML

List tokens on the OL DEX

Our Projects: OpenLedger DAO Space

SUPPORTERS AND INVESTORS

Browse best pre-verified blockchain projects

Invest with coins or native BitShares assets

Track KYC/AML verification process

Audit all token sale and funds management

Our Projects: EDEV — P2P Services Marketplace

The most reliable job platform in the world.
Transparency, decentralization and P2P service transactions.

Our Projects: EDEV — P2P Services Marketplace

Enhanced usability

- Easy sign-up for service providers and customers
- Advanced jobs and service providers search

Convenient payments

- Payments via BitShares accounts with 50+ coins, including smartcoins
- Escrow payments and disputes resolution
- Instant payments and money withdrawals
- Low fees

Operations transparency

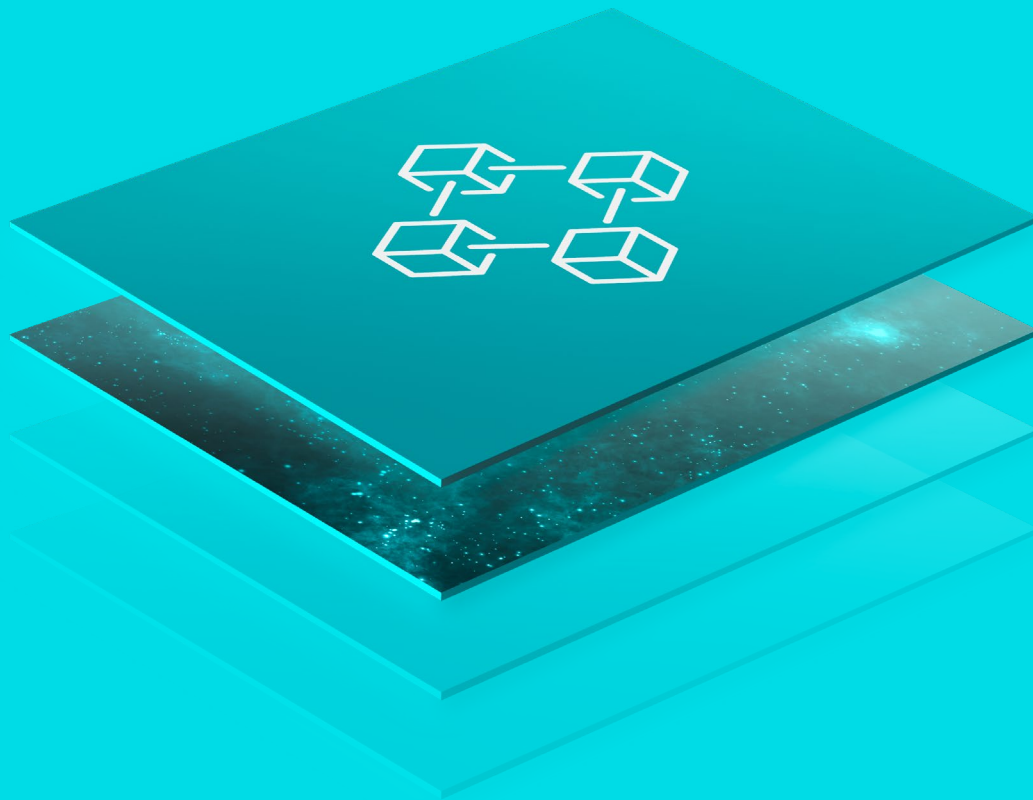

- Private protected messaging
- Fair and transparent ratings
- Disputes resolution on-chain
- P2P transactions facilitation

Our Projects: BitShares Core Improvements

- Security improvements: Beet app and BSIP 40 (Custom Active Permissions) introduced
- Referral program update: BSIP 43 (Market Fee Sharing)
- VM & Smart contracts on BitShares
- New BSIP: Market Fees Backed Asset

WHAT'S NEXT?

- Smart Assets (MPA) improvements and promotion: prediction market, CFDs, Futures, P2P lending
- Make Bitshares the home blockchain for DAOs
- Sidechains
- Decentralized gateways

Our Projects: genEOS

A blockchain-based ecosystem to design and launch decentralized apps for enterprises in virtually any industry.

- Millions of transactions per second
- EOSIO-based
- Legal worldwide
- Secure
- No transaction fees

Features for businesses

Accounts, authentication, monetization, databases, applications scheduling, smart contracts, permissioned hierarchies and more.

Sky-high performance

Offers enterprise-level transactions speed and maintains the same high performance regardless of app scale.

Truly open-source

All the code behind the platform is available on GitHub.

Seamlessly scalable

Grows your apps without slowing down or acquiring enormous amounts of resources.

OpenLedger Decentralized Conglomerate

Blockchain powered.
People driven.
