Graphene Blockchain Application Center

Jademont Zheng (Xiaoshan)

Bitshares Committee Member
GBAC Executive Committee Member
Founding Partner of Waterdrip Capital

01 Motivation

The competition between blockchains is more of competition between ecosystems.

The spread and popularity of Graphene technology is lower than expectation, Baidu has only 56K "Graphene blockchain" search results , at the same time "Ethereum" has 11 400 000 results, bitcoin 13 800 000, blockchain 17 100 000 results.

Low communication within Graphene ecosystem, some outstanding Graphene based projects can't popularize Graphene technology on a large scale. Now we have 30+ projects based on Graphene: BitShares（30）, Steem（39）GXShares（83）. Most of the projects are independent in its development and don't have much communication.

Global Graphene application center was established to promote the development of graphene ecosystem and technology, popularize graphene technology among the developers, to strengthen projects cooperation within graphene ecosystem.

02 Vision

Research

Organize technology research, promote Graphene technology iteration and evolution

Talents pool

Establish Graphene technology talent pool, Technology Partner reserves

Online Courses

Develop online courses about graphene blockchain development and popularize among 2million developers.

Promotion

Promote graphene blockchain technology and projects based on it with multi-media

Incubation

Incubate projects based on graphene technology

Active Projects in Chinese market

GXS
2017.6.15 GXChain launched mainnet, GXS listed, has 1 830 000 registered users, daily active 40%
daily maximum application flow is 300K

bitshares
2013.11 went online
More than 1M registered users
190K active users

ORACLECHAIN
English community has more than 69K members
Chinese community more than 5K members

YOYOW
Active users 8881
Several platforms based on YOYOW public chain

鼓鼓钱包 MAG GWALLET
2017.08 went on-line, 76K registered users, daily increase 200+

CYBEX
Number of registered users more than 34K

EOS
More than 190K accounts

Token++
Support multiple types of coin, Bitshares exchange and industrial application in one. 2.0 released in May, registered more than 20K users

SEER
Mainnet registered users 12429
5-7 Dapps are expected to be online at the end of the year

FINCHAIN
Registered 16549 wallet users
Bitman registered users more than 500K

Community registered users 220K +
Daily active 30K+, forum registered 70K+, daily active 5000+, foreign community more than 30K

DECENT
Active users more than 11K
Already went online 2 Dapp

Dated by 2018.6

More known Graphene Projects

Category		Category	
Basic protocol	EOS, gravity	IoT	μNEST
Content and copyright	STEEM, DECENT, YOYOW, MUSE	AI/ data sharing	BOTTOS 去中心化人工智能数据合约
Wallet	bitshares, MAGICWALLET 鼓鼓钱包, Token++	Prediction Market	SEER
Exchange	CYBEX, OpenLedger, GDEX, DEEX	Social communication	crypviser
Financial services	FINCHAIN, DasCoin, payger, Karma	Sport and media platform	SCORUM
Economy data	GXS	Blockchain solutions	ORACLECHAIN, ARK.io
Gaming platform	PEERPLAYS	Scientific ecosystem	DEIP

What we have done

Hosted Global Graphene Blockchain Developers Conference

● 30+ Key speakers 1000+ Participants more than 60% are developers

What we have done

Hosted China Graphene Blockchain Developers Conference

● 12+top blockchain projects 400+ participants more than 50% are developers
   more than 60% are enterprises senior executives

Plans in near future

Technology：
1、 API capability improvement
2、 database efficiency improvement
3、 Graphene blockchain cross chain
4、 UI improvement

Business：
1、 Certification from government dominated alliance
2、 Investment from government dominated fund
3、 Book about Graphene blockchain

Marketing：
1、 Weekly news
2、 Devcon
3、 Video on mainstream media

06 Partners

Waterdrip Capital focuses on innovation in blockchain, committed to invest in industrial blockchain ecosystem, to Blockchain underlying technology, to Blockchain business scenario, fund's directors are senior industry players, involved in digital currency and blockchain industry from 2011-2013. Company registered in the British Virgin Islands, office is located in Zhejiang, Shanghai.

Waterdrip Capital focuses early investing in high quality projects and support Chinese blockchain technology. Since its foundation in 2017 projects invested in EOS、COSMOS、GXS、Qtum、Vechain、YOYOW、EchoLink、SDChain、EOS Gravity、Rchain、Tokenclub、BOX、Alphacat、M2Cchain、DHC、Beenews、Iris、Palletone、Bitguild、Cashbet、palletone, MTS etc.

YOYOW CTO
DPoSClub founder

Ma Baochun
μNEST Founder&CTO

Zhang Zengbo
Magic wallet CTO

Zhu Liting
Gxchain core developer

Luo Meiqin
Bottos core developer

Gong Zibin
Bottos core developer

MorningTech is a worldwide leading provider of blockchain technology and industry solutions, have the ability to build upper level business application, ability to meet large scale user scenarios, focus on innovation in blockchain technology and products,
30+ qualified deep knowledge of Graphene, DEX, wallet etc.,

DPoS.Club is a group of DPoS believers raised in Graphene developers community. They have rich experience in product development, operation and maintenance.
Team believes that DPoS and its variants is an online mapping of perfect system in reality, which may be the final form of the consensus mechanism.
Thus, the DPoS.Club team is dedicated to help developers to build a DPoS ecosystem and help to drive the evolution of this project.

BitSG is a team from Singapore where policy about cryptocurrency is friendly. BitSG will devote themselves in Graphene/Bitshares marketing, bitCNY/bitUSD acceptance dealer, and so on.

EOS Gravity community, its one of the most popular blockchain communities in China with HQ in Shanghai. It's mission to provide in-depth analysis of blockchain technology and EOS public chain, together with high quality EOS information and support, all ecosystem enthusiasts transformed to EOS fans and promotes EOS projects

Currently, there are 120K+ community members

Bihu Community is an platform for crypto investors to share and obtain token-investment-related information. Community follows the concept of "good texts and good news" and help investors to better understand and invest in digital assets.
Community has reward system to incentivize content generation within the Bihu Community. Bihu is not only information platform for investors, industry opinion leaders and high-quality content creators, but also a platform to obtain currency-related information and for "currency officials" to communicate with community members.

About a million registered users.

Bitask is the most popular Chinese question and answer platform with automated rewards, users can share their experiences and insights. 币问 has been also linked with YOYOW with automatic incentive mechanism, it means that 币问 users can be rewarded with YOYOW tokens.

150K+ registered users

● Strategic partner

● Associated media

Beenews is the value discovery platform for blockchain and digital currencies based on meta-graph chain (BKBT-Token), for providing the users with the smart feeds, knowledge graph, CV-Rank index (coin volatility rank), and growth track index of the digital currency, assisting the users in seeking for value investment and avoiding the investment blind points, and popularizing the block chain knowledge to drive the healthy development of the block chain ecosystem

More than 1 million registered users

GDEX is a digital asset exchange platform based on Bitshares, which can provide users with high quality services. It provides a complete set of backend and digital assets management. Relying on Bitshares platform provides users with safest, most efficient, lowest cost and innovative services. Its an important part of Bitshares decentralized trading system.

Asset management: based on Bitshares digital asset platform
Gateway service: connecting BTS out-of-chain assets and BTS internal assets
Technical services: Provide technical solutions ,follow-up research and development support
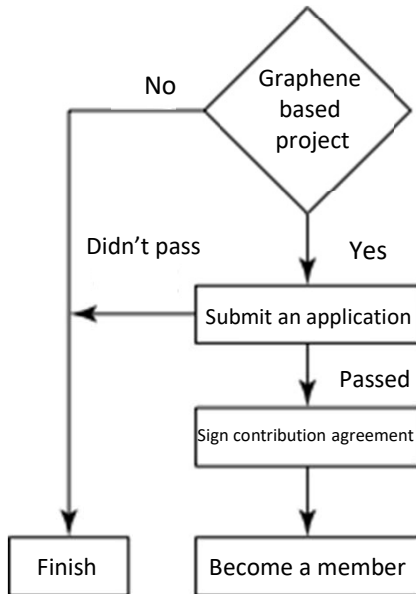

06 Partners

Shenzhen Xiaoyuren Technology.,Ltd (深圳市小鱼人科技有限公司) company has its own independent intellectual property security services and enterprise security tools. It focuses on enterprise Internet safety technology, RnD security related products, enterprise security service support. Its aimed at providing enterprises with reliable internet security services. Currently, it has Blockchain security solutions for digital assets, directory structure detection, port open detection, third party information disclosure etc.

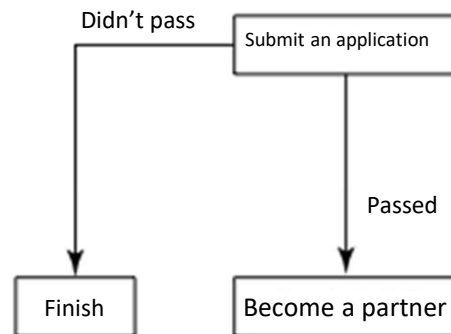

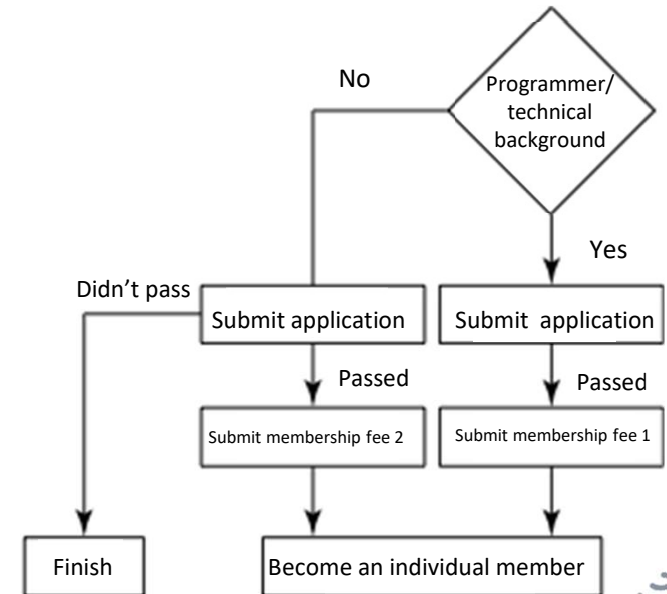

07 Join us

Governing membership privileges

Meetup brand exposure once
Global graphene blockchain developers conference exhibition booth (only pay the cost price) / promo materials
Graphene technical research report (yearly) send
Graphene technology development course (development case included)
Participate in hackhatons/App innovation contest, jury preferred
Share application center resources

Membership privileges

Global graphene blockchain developers conference roll up display
Graphene technical research report (yearly) send
Hackhatons/App innovation contest priority participation
Share application center resources

Individual membership privileges

Technical member
Blockchain company recommendation
Talented developers enter independent developer pool
VIP and normal tickets discounts for hosting events such as Graphene conf.
Graphene ecosystem priority investment
Non technical member
VIP and normal tickets discounts for hosting events such as Graphene conf.
Priority investment for Graphene projects in China and abroad
