# DasCoin™

Das33: A New Way to ICO
Michael Mathias, CEO DasCoin

BitFest
September 22, 2018
Amsterdam

The DasCoin Difference

Hard fork of BitShares blockchain (2016) enhanced for performance and flexibility

Speed

BLOCK TIME

Scalability

TRANSACTION PER SECOND (TPS)

Security

AUTHENTICATED NETWORK

Speed		Scalability		Security
Bitcoin:	~10 minutes	**Bitcoin:**	3 tps	A KYC (Know Your Customer) authenticated community, protected by industry leading security protocols, including the requirement for every account holder to use a hardware device (The Validator)
Litecoin:	2.5 minutes	**Ethereum:**	20 tps	
Ethereum:	14 seconds	**PayPal:**	115 tps	
DasCoin:	3 seconds	**Visa:**	~2,000 tps	
		Visa (Capacity):	56,000 tips	

DasCoin (Capacity):

100,000+ tps

AlliancePay & DasPay
Ways to Spend DasCoin Easily

Problems with ICO Model

Lack of legitimate businesses behind the plans

No control for investors over the spending within ICOs

Difficult to assess the real value represented in the token

Das33: A New Way to Tokenize Value

<u>Quality Focus</u>: Selective presentation of most promising projects

<u>Protection</u>: Assessment Committee, Escrow, Milestone Releases

<u>Innovation</u>: Premium tokens based on KPIs; systematic buy backs

Premium Token: A Better Format

Innovation: Neither a utility token, nor a security token

Performance Focus: Deposits made based on achievement of KPI

Structural Benefits: Premiums in DASC, without selling; clarity
